 - How to start your project 8

- DesignPro Basics 11**
 - How to use the Design screen 11
 - How templates are designed 12
 - Work area..... 12
 - Tab Bar..... 12
 - How to use the Master and product tabs 13
 - How to create identical and different labels 14
 - Menus 17
 - Toolbars..... 17

Start your design	21
How to create your design.....	21
Insert and format text	21
Insert and format circular text	22
Insert date and time	23
Insert and generate serial numbers	24
Insert images, logos, and clipart	26
Insert and create bar codes	28
Save and print your project	31
Save and rename a project	31
How to print your project.....	32
Print your project	32
Print identical labels or product panels	33
Print different labels or product panels	34
Print two-sided products	34
Print Direct Print® Custom Dividers	36
Print to the edge of a product	37
Print projects with database fields	38
DesignPro Lessons	41
Open a Microsoft Excel dBASE III file and mail merge	41
Open and link a database using ODBC and mail merge	47
Customize a pre-designed greeting card	53
Create CD/DVD labels	57
Create Index Maker Clear Label Dividers	61
Create a Sign.....	64

Work with databases	67
How to work with databases	67
Use databases in DesignPro	67
Create a new database	68
Open DesignPro and other dBASE III databases	69
Open databases created in other programs using ODBC	70
Convert and open an Avery LabelPro™ database	72
Insert fields and merge database information	73
Display and navigate between records	73
Modify database fields	74
Edit database records	75
Sort database records	77
Filter and select from a database	77
Create bar codes using a database field	78
Display database information	79
Close or deactivate a database	79
Index.....	81
