

Here are the “Locations” for the three pieces of software

“Left Click” on the graphic to go to the appropriate location at download.com

Make sure you then “Click” on the “Download Now” button to save the program

Most downloads will be save in your “download” location

CCleaner is a great program to clean up “fru-fru” left over from updates, etc. Make sure to uncheck all the “cookies”. Also remember to use the “Advanced” option.

Free

Malwarebytes is also a great program. It removes malware.

Great for downloading video. Again make sure you decline any additional software or toolbars.
