CREATING A CHRISTMAS PLAYLIST
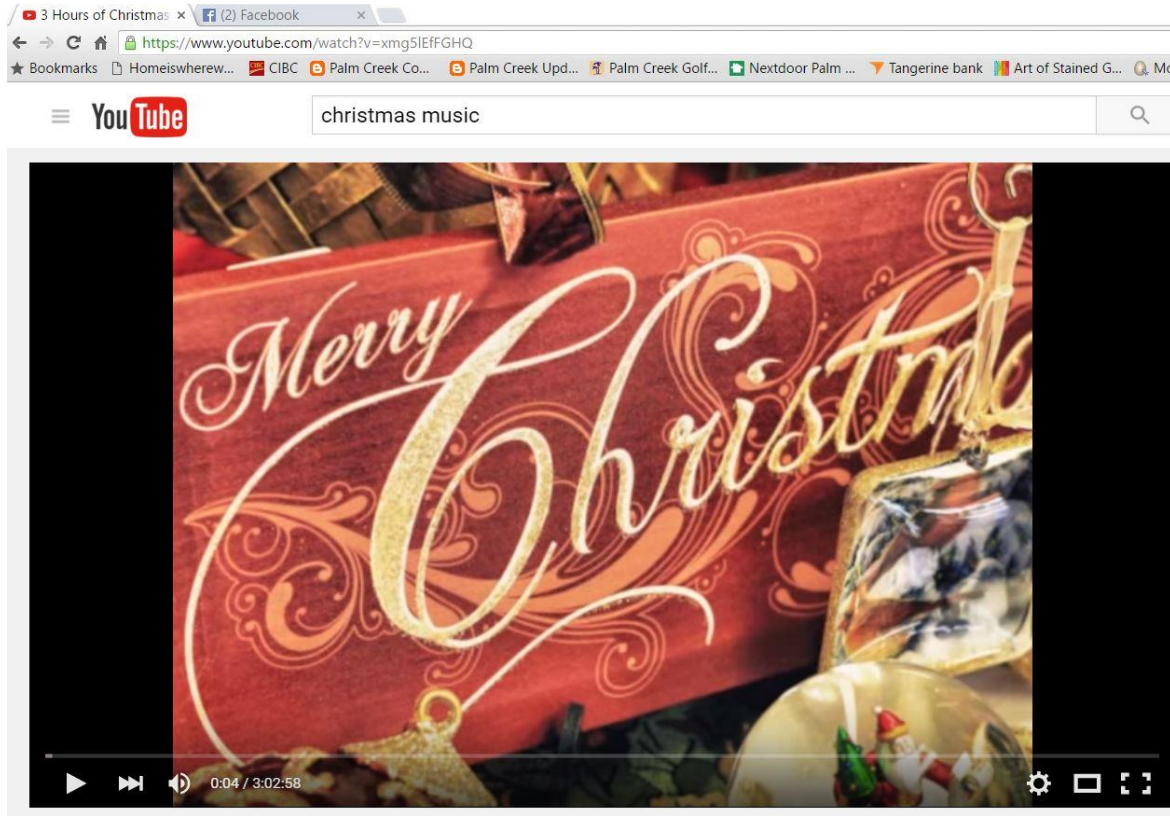

Palm Creek Computer Club – December 2015

USING A VIDEO DOWNLOADER
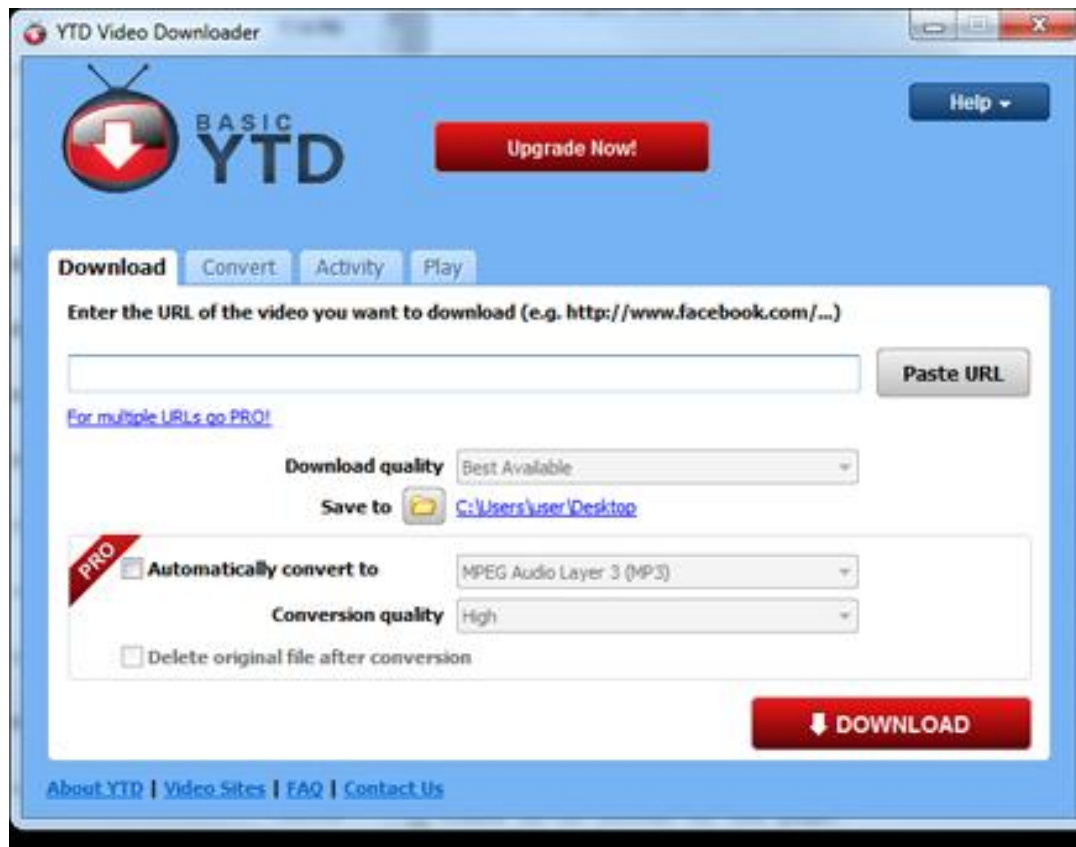

- Go to www.youtube.com
- Search for the video
- Start the video
- "Click" on the URL address
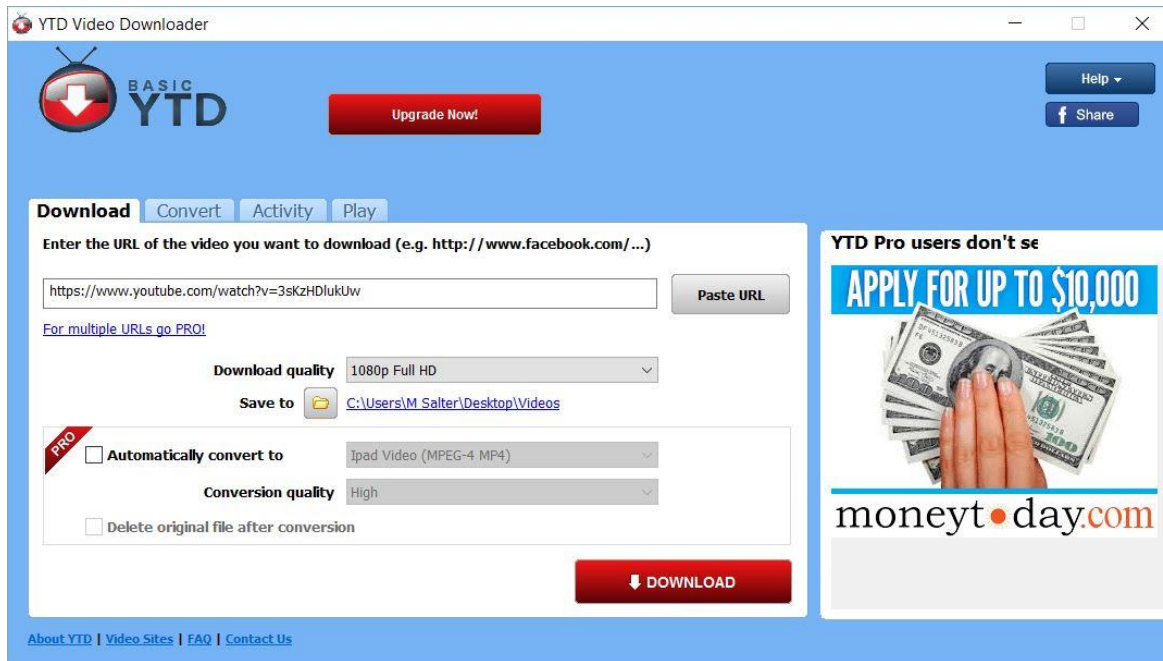

- Start YTD Video Downloader
- "Click" to enter address in program
- "Click" Download Button

- I usually create a special folder. It makes it easier to find.

- Repeat selections

- It will slow down if you try to download too many videos at one time – three (3) is ok

- Wait until all videos are downloaded
- Note: Videos are mp4s and are sometimes quite large

- Next Step is to convert the mp4 (video) to a mp3 (just audio).
- There are alternate conversions for Iphones, etc.

- Some of the conversions take a bit of time

The USAF Band - 2014 Holiday Flash Mob	2015-11-17 1:37 PM	MP4 File	103,298 KB	00:06:44

- Note the difference in size between the mp4 and the mp3
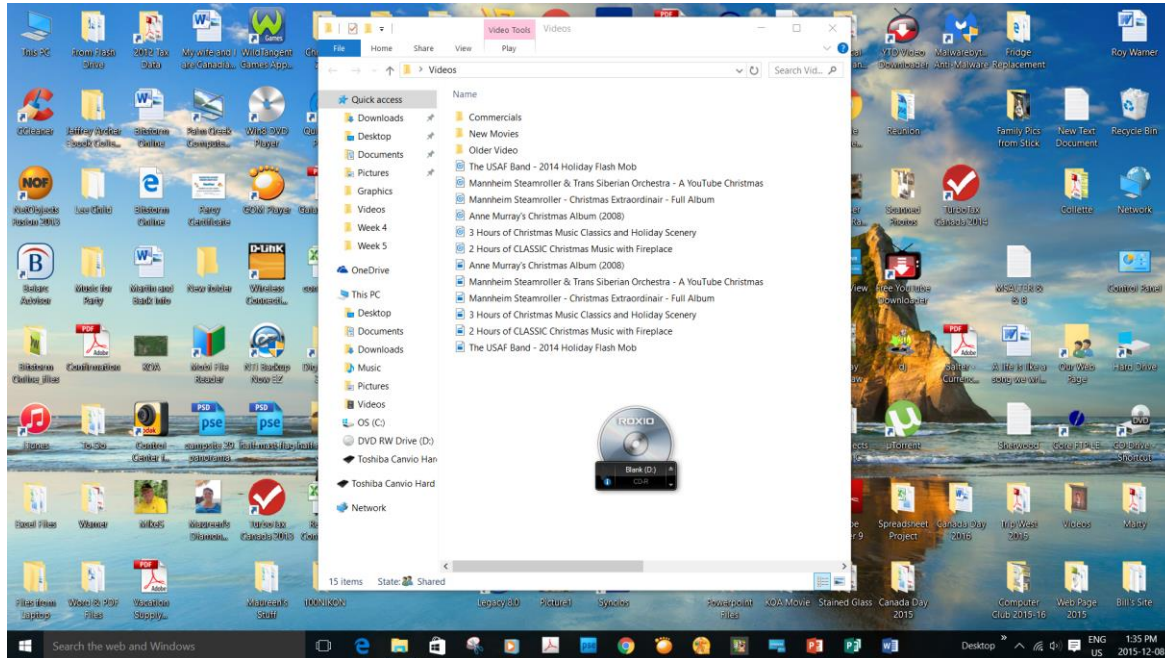

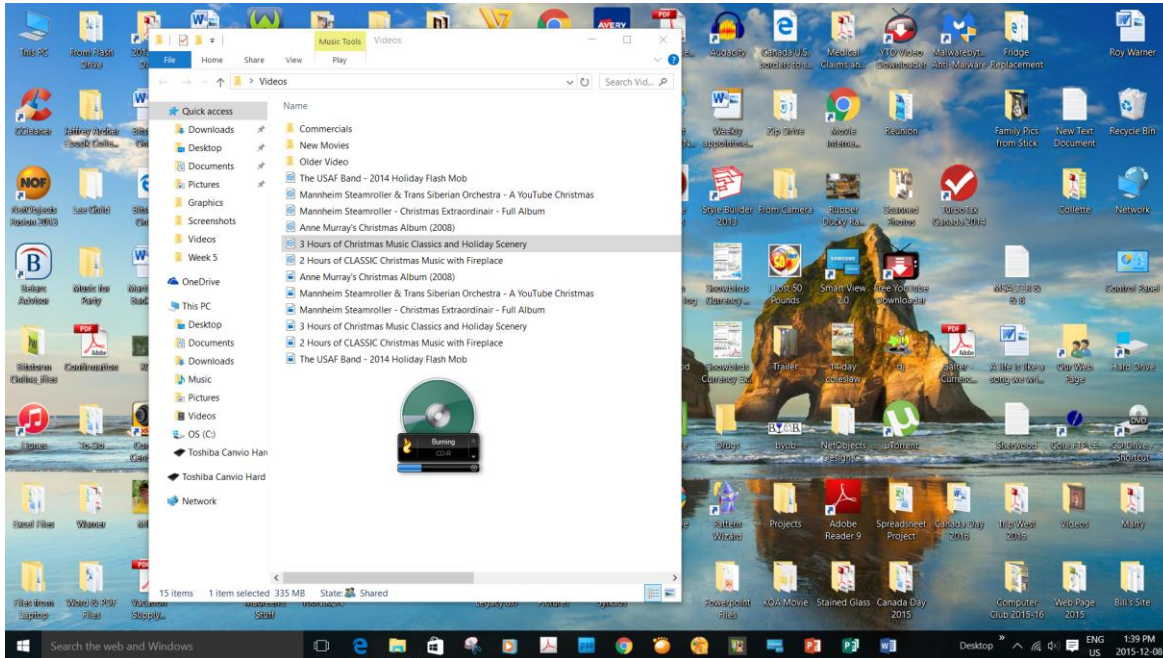

- I use a program call Roxio Burn to make my music CDs.
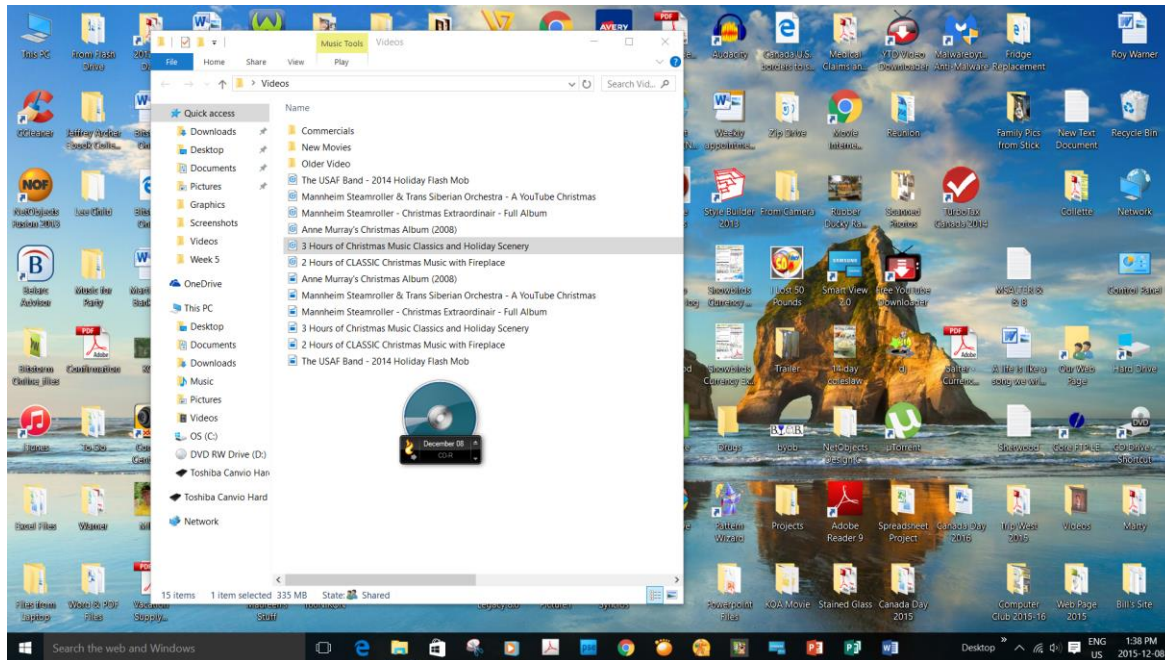

- Drag and Drop until the CD "Image" is almost full.
- Remember – just choose the mp3s

- Click to burn the CD

- All Done!

- Use a "Flash Drive" as your storage device.
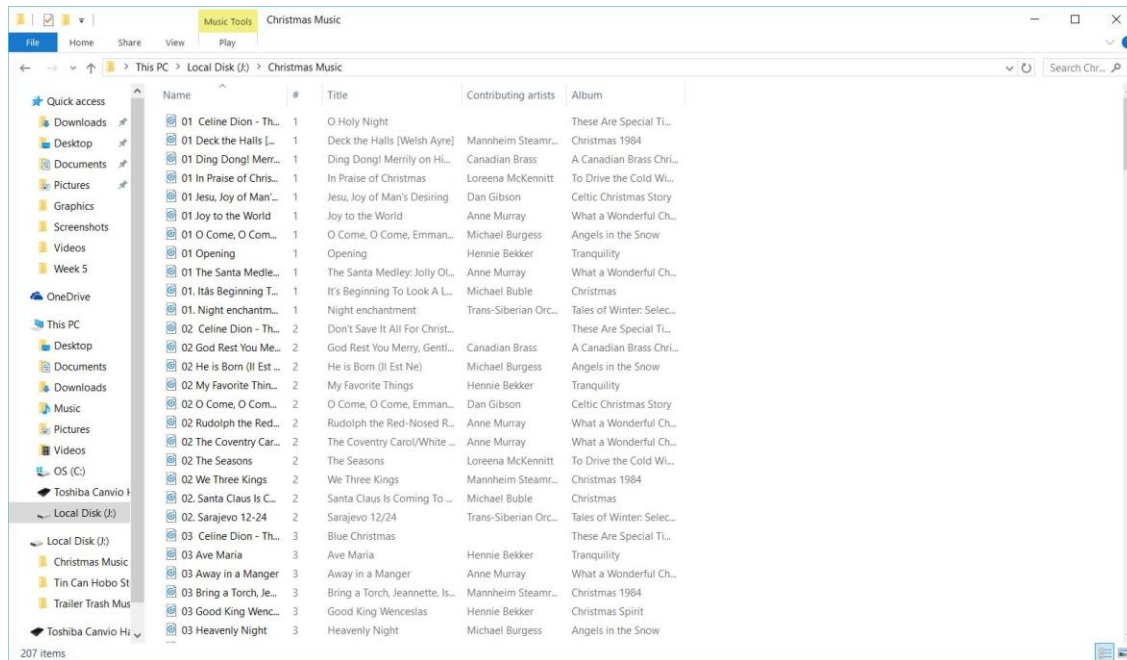

- You can save a lot of music on a 16GB Flash Drive

- I sort by "track number" before I transfer to the Flash Drive. It "mixes" the albums.
